### INFECTED AREAS. Cattle Almost Better.

A minute by the Colonial Veterinary Surgeon relative to an outbreak of foot and mouth disease at No. 7 shed and the hospital shed, Sassoon's Villa, and No. 4 shed Pokfulum, was submitted at the meeting of the Sanitary Board this afternoon. . Mr A. Gibson stated that foot and mouth disease had appeared amongst the Dairy Farm Co's cows of No. 7 shed. Sassoon's Villa, Pekfulum Road. One cow was sick and seven other animals at one end of the shed while at the other there were eight affected. The cow and the other seven animals had been removed to the hospital shed while the others had been allowed to remain. The Manager had also reported that the disease had broken out at No. 4 shed containing twelve animals. Mr Gibson had had the affected sheds closed provisionally and recommended that those places be declared infected areas.

The Select-Committee appointed to deal with this matter had declared the places infected.

To-day Mr Gibson minuted-I have to report that the situation is practically unchanged since last report. There have been no deaths and the animals first attacked are now almost recovered.

Cicely.-Second interim dividend 50 per cent. on ordinary and 511 per cent. on preference shares. Taiping. The prop rties have been

transferred as from August 1, since when 9,387 lbs. have been produced. Glen Bervio.-The report year ended September 30 shows balance of £404, and

dividend of 2 per cont. is recommended ... Brich.-The directors report tapping c mmenced March last. To July 31 the output was 3,238 lbs., which realised £061 or an average of 5s. 11.28d

Java Rubber Plantations .- The accounts, after writing off balance of the preliminary expenses (£294), show a credit of £718 The planted area is 2,072 acres. No dividend is recommended.

Angle Dutch Estates Agency.-This has cen registered with a capital of £50,000, in £1 shares, to carry on the business of agents for the management and development of estates. First directors are F. Copeman, W. F. de Bois Maclaron, J. H. Marinus, H. R. Stunzi, J. C. Tate, and H.

Singapore Para Rubber.-Mr Keith F. Arbuthnet, presiding at the meeting of the Singapore Para Rubber Estatos, said that the company had acquired additional land during the year adjoining one of their ce tates, and admirably suited for rubber. Being covered with beavy timber, it was of great value as a source of revenue in con-Junction with their saw mills. The land had been acquired on very favourable terms anditasequisition had already enabled them to make a saving of 20 per cent, on new buildings, through having their own timber. With such a handsome profit as they had

carned- £19,816-it would be possible to pay more than the 121 per cent dividend which the directors recommended, but in view of the fact that the profit had been carned over a period of fourteen months, and was due largely to the high price of rubber, the directors had thought it a wise policy to write off all preliminary expenses. and carry forward a substantial sum. Pegoh.-Int. div. 10 per cent.

Sandycroft Int. div 50 per cent. Rembin.-Div. 3 per cent., leas tax on

Pataling .- Int. div. 75 per cent. (actual) myable Jan. 2.

Sungei Kari.—The report to June 30, 1910, states 830 acres are cultivated, and 3,703,892 562 acres are reserved for the native popu-471.218 lation. Approximately 102,000 Hever trees planted, and topping has recently Langen (Java).-Owing to misunder-

standing of the English agreement, there has been considerable delay in signing the final accounts, and the directors propose to adjourn meeting that has to be held this year to June, 1911, or earlier.

Serdang (Sumaira). - A circular sent to shareholders encloses copy of Mr Bell's report on the estates. As certain discrepancies have been found as to ages of the rubber and coffee trees, the directors have retained £5,000 of the purchase money pending settlement of the question with

## TORIC LENSES

· P REPRESENT the greatest improvement in spectacles that has been made in your life-time. THE OLD STYLE flat lens gives a restricted field of visions—you must look through the con-tre of the lens to see correctly.

WITH THE TORIC LENS, on the contrary, you have correct vision looking through any part of the leas. You move your eyes instead of turning your head from side to side. P TO THE TENNIS PLAYER, trap shooter,

the cricketer, the billiard player, in fact in all fields of sport, the TORIC LENS means a better score because of quicker and better vision. F THE TORIC LENS corrects the error of vision better than any other—it comes nearer making the eye natural. Wearers of Toric lenses never

ge back to the old style. WE GRIND TORIC LENSES to any prescription from clear or tinted optical glass of first quality. We absolutely guarantee every pair made.

IS LAZINESS A DISEASE. An Easy Method of Overcoming Lassitudo.

SIR Joseph Fayrer, in his book, "The Preservation of Life in India," points out that the "exposure to the direct solar heat or to a high temperature in the shade may induce heat exhaustion, ardent fever and other evils of a more insidious character, by injuring the nervous system, in-crossing irretability, depressing vital energy, and affecting the internal organs, especial-

Leaving out of consideration the serious conditions which are sufficient to prevent 5 the sufferer attending to his duties, we are, nevertheless, brought sharply up when we consider the importance of depressed vital energy which manifests itself in a feeling VOUNG BRITISHER with experience thing involving either mental or physical

"Lazy" is the epithet which those who are highly endowed with vitality invariably apply to those who exhibit the symptoms of this enimi and overmastering disinclina-

Lazy is, however, the one thing they are not. How far their condition is due to a draining away of the phospherous which, as Professor Tunnicliffs, of King's College, London, has pointed out, "it is almost THE interest and responsibility of MR certain has an essential importance for the WILHELM HELMS in our Firm life of the cell and for the bio-chemical processes going on in it " has not been accurately determined. Then there is reason for supposing that it is due to this cause! proved by the fact that people who are languid and incupable of much exertion derive benefit from taking salts of phosphorus, in the same way, as do sufferers from conditions in which those phosphorus salts are nearly always desicient in the

> Great Medical Opinions. For lack of energy, which involves physical debility, "the best and most readily assimilable food is a combination of casein with glycero-phosphates," as Dr D. B. Jones has written in a paper, an abstract of which was published in the "Indian Medical Gazette" some little time ago. For some years past he has obtained this combination in Sanatogen, which, as most people now know, is a chemical combination of the pure casein or the body-building element of milk with glycero-phosphate of sodium. The phosphorus in this wonder-fully invigorating and revitalising preparation is in exactly the same form as that in which it is found in the nervous system It is, therefore, easily assimilated, and affects a rapid improvement in the general condition. Moreover, as that distinguished physician Sir William Gowers has point ed out, phosphorus notably increases the proportion of the red cells in the blood. It must be clearly understood that the phosphorus needed in these cases of lassitude and lack of energy are best supplied in the form of Sanatogen and must be regarded as a food, not as a medicine, since it supplies an element which is notably

deficient in the body. When Sanatogen is taken, the sufferer is rapidly restored to normal vigour and vitality. He is soon able to resume his duties with alacrity, and to perform them without fatigue.

Sir Gilbert Parker's Advice. This restoration of energy by means of Sanatogen has been attested by many thousands of people, both in the tropics and in England. This striking statement on the subject is made by Sir Gilbert Parker, M.P.: "I have used Sanatogen at intervals since last autumn with extraordinary benefit. It is, to my mind, a true food tonic, feeding the nerves, increasing the energy, and giving fresh vigour to the

overworked body and mind." His accurate definition of Sanatogen's power to increase the energy and give fresh vigour to the overworked body and mind cannot fail to make a notable appeal to all residents in China who are so prone to suffer from these conditions, which arb begotten by the enervating climate. By revitalising the blood and improving its quality, as well as by increasing the tone and strength of the whole nervous system and the general bodily functions, Sanatogen will also increase their stock of health, and make them better than they have ever felt in their life, for that is the common experience of those who take the preparation. Sanatogen has the unqualified written endorsement of more than 12,000 doctors, among whom are the physicians to ten crowned heads of Europe, including Dr.

Ott, who was for many years his late Allagar .............. 3,850 32,877 Majesty's physician at Marienbad.

A Medical Officer Debility, Nervous Exhaustion— Certainly the absolute confidence of eminent doctors is avidence enough of the exceptional benefits imparted by Phosferine. Even doctors cannot do more to prove their confidence than by using Phosferine to remedy their own disorders. Could any proof be more definite, more convincing than the testimony of John Dodd, D.S.M., Medical Officer in the late South African War, who says: "After being shot through both lungs I was dangerously reduced, and I attribute it solely to Phosferine that I. regained my usual health. I have proved the value of Phosferine in brain, nerve, and muscular exhaustion. This brilliant medical officer found Phosferine particularly serviceable for insufficiency of nerve force, and declares nothing was so suitable in combating fevers, chills, &c. Not possible now John Dodd, D.S.M. (late of the Medical Staff, 5th Imperial Yeomanny, .1st Brigade, South Africa), Ladysmith House, Witton-le-Wear, writes: -"I have had considerable experience in the use of your invaluable remedy Phosferine, and it has proved particularly serviceable where there exists insufficiency of nerve force. This condition often due to primary

indigestion, fevers, and in remedying this predisposition I have found-.nothing so suitable as your preparation. Phosferine invariably goes to the root of the mischief direct. The certainly of its action is moreover an estimable feature. In debility and kindred ailments, caused by a reduced system, it lias unprecedented hower, and in my own case I can bear evidence to its exceptional value, and am indeed greatly indebted to its wonderful restorative properties. During the late war in South Africa, I was shot through both lungs and pericardium and that reduced me most dangerously; after taking Phosferine for about two months it brought me back to my usual health. I attribute this solely to the use of Phosferius. I have advised Phosferine in several cases, and proved its value in brain, nerve, and muscular exhaustion."-March 11, 1510.

### PROFESSOR GROSSI.

As announced in our advertissment columns, Prof. Grossi and Mile. Reno give their first performance here on Thursday next in the City Hall. We have been shown a book of newspaper cuttings obtained from practically all over the world all giving laudable reports of Prof. Grossi's wonderful work. The following is but one of the many excellent critiques we read and is taken from the Daily Express dated

"Professor" Grossi, an Italian who has created something of a "Zancig" sensation n India and South Africa, and who gave private demonstration of experiments in telepathy and auto-suggestion at the Savoy Hotel yesterday, describes himself as "The

"The "professor" does not exaggerate His "experiments" " delighted and bewildered a critical audience. The proof of the cleverness of his performance lies in the fact that two gentlemen representing famous music-hall combinations assailed

THE WORLD'S COTTON CULTIVATION.

Professor Dunstan's Report.

The report on the "Present Position of Cotton Cultivation," which was presented by Professor Wyndham Dunstan, Director Atlas of the Imperial Institute, to the Inter- Bramble national Congress of Tropical Agriculture held in Brussels last May, has now been published by the International Association Clie of Tropical Agriculture and Colonial Dovo- Fame lopment. To it are appended special reports | Flora on the present position and prospects of cotton growing in each of the actual and potential cotton-producing countries of the world. Attention is drawn to the fact that Kinshe at present the sub-tropics produce the majority of cotton of the quality required | \* Minotaur by the Lancashire manufacturer—namely, the United States and Egypt. Information given as to the present condition cotton cultivation in both these countries. Otter Emphasis is laid on the fact that in the Robin United States the industry has had the Sandpiper great advantage of the assistance of an Snipe efficient Government Department of Agriculture, whose labours have contributed in no small measure to surmount the many obstacles with which American cotton culti-KING EDWARD HOTEL vation has had to contend. In Egypt the absence of any Government Department of Agriculture to afford guidance to the cultivator and to conduct experiments is deplored, although credit is given for much valuable work to the Khedivial Agricultural Society. In a footnote it is added that the Egyptian Government has now decided to create the Agricultural Department which has been so long needed. It is understood that Mr G. C. Dudgeon, Inspector of Agriculture in West Africa, who in that capacity has been attached to the Imperial Institute, has been chosen as the first Director-General of Agriculture in Egypt. The problems to be solved in connexion with Egyptinn cotton growing are discussed, and reference is made to the great possibilities presented by the Anglo-Egyptian Sudan for bringing a large area of that country Alger

> Times of October 14. The prospects of cotton growing in the British Empire have been discussed in Pro- Dupetit-Thouses fessor Dunstan's report to Parliament of Estoc last year. In the present report they are Esturgeon separately considered, as is also the position Fronds in India. Stress is again laid on the importance of continuous experimental work under Government anspices, since the problem in most countries is to establish an acclimatized type of cotton suitable for the purposes of the manufacturer. Progress, though slow, appears to be satisfactory. In Olry Nyasaland success seems to have been Peiho schieved, a new cotton, to be known as Pistolet "Nyasaland Upland," having been of Protee tabliched. This cotton is said to be in Redoutable some respects superior to the best "Am- Styx erican Upland" and to satisfy all the Taking requirements of Lancashire. The prospects in Uganda are mentioned as of special promise, and the progress made in West Africa is referred to, attention being drawn to the developments which are likely to occur through the opening of the Northern Nigeria railway, now approaching completion. Accounts are given of cotton cultivation in Franch, German, Dutch, Numburg Portuguese, and Italian Colonies, and also Otter in South America, the South Sea Islands, Scharnhorst. Japan, aud China. In China it is stated that the production of a coarse cotton has Tiver now reached 600 million pounds annually, Tringeau and the effects of an extension of this

cultivation are considered. Asia Minor is spoken of as a promising field for the growth of cotton of the Macao "American Upland" type, and in this Patria connexion reference is made to Professor Republica Dunstan's previous report on this subject, and specially to the openings for cotton cultivation presented by the great plain of Albany China. The importance of the work of the British Cotton Growing Association is dwelt Barry upon and it is satisfactory to learn that the Callao British Government has decided to assist its operations by the conditional grant of £10,000 a year for a term of years. It is also understood that the Chancellor of the Exchequer has under consideration the question of assisting British enterprise in the Sudan in operating on a large scals in a promising district of that country, in respact of which, as has been recently pointed out in these columns, Great Britain has an important wested interest and ros-

Rule will come soon, and the result will be that, if the Irish are turned out of Westminster, the Unionists will have a majority and ought to keep it. The Liberals will try and prevent this by keeping the Irish in the House of Commons to maintain a majority, but surely this absurd arrangement will not be allowed. there are signs that it is to be devolution all round-Home Rule for Ireland and Grand Committees for Wales, and Scotland, and England. Seeing how things are going I hope allowed in the sum of \$20,000. it will end in Home Rule all round and an Imperial Senate for Imperial affairs with the Peers represented in the Imperial Senate by election of a certain number of themselves, the remainder being elected by the local Parliaments; F. That is a throughly practical solution of a knotty problem put forward by an Overseas man who can view the course of politics in the old country from the outside. Unfortunately it will not be such impartial thinkers who will decide the question. The decision rests with the electors of the United Kingdom, and the aggregate wisdom which they display when called upon to face grave constitutional crisis does not justify the student of history in forming an optimistic opinion as to the kind of answer that they will give. A narrow parochialism dominates the minds of the immutable many into whose hands the destinies of a mighty Empire have been placed, and they are more likely to bring it to wreck matter. than to devise far-reaching schemes which shall conduce to its further development and prospective con-

DANGEROUS GOODS ON BOARD SHIP.

Before Commander Basil Taylor, R.N., at the Marine Court this morning, Captain charged with unlawfully carrying dangerous goods under a false description on board his ship on December 17.

Sergeant Taylor stated that at 4 p.m. on the 17th ulto. as the vessel was leaving b went down into one of the holds and found a drum of gasolene and 35 cases of kerosene oil. The Chinese passengers had free ac cess to these dangerous goods and their luggage was in the vicinity. Their mats were spread out on top of the tins kerosene. He called the attention of the master to the fact and the captain had the gasolene removed and further said he would remove the kerosene. As the ship was under way witness had to leave before they

were removed. ... Mr F. Lenfesty produced the ship's clearance in which the cargo was described

Defendant said that on the day he went to clear the dangerous goods were on board | men. and no order for shipping any had been received. On previous trips he had generally carried some, embarking it at the dangerous goods' anchorage, east of Kellet Island. The Chinese passengers were allowed to take shelter wherever there was room for them and some of them went into the compartment in which kerosene was generally stored. As the passengers were being mustered a lighter came alongside with the dangerous goods and the mate hoisted the red flag. It was never intended that the passengers should be carried in the same compartment as the oil. He was

aware that he ought to have reported the

His Worship said there was no doubt in his mind as to the intention of the Ordinance and continued that the import of the word "General" as applied to cargo was generally accepted to be applied to cargo which might be stowed together and certainly did not include dangerous goods. At nearly every other port in the world the master pensed with. Sub-section 5 of section 15, though it did not expressly provide for a specific report of dangerous goods carried implied that such was necessary, otherwise how was the Harbour Master to know that such goods are being carried? He therefore considered that the charge of attempting to carry dangerous goods under a false description had been proved. A fine of

BANKRUPTS DISCHARGE REFUSED.

Possible Criminal Proceedings.

At the Bankruptcy Court this morning before the Chief Justice (Sir F. Piggott), Mr W. B. Hind applied for the discharge of a debtor named Leung Pak-leung. He said the Official Receiver had filed a very lengthy report in the case, and although he (Mr Hind) admitted some of the facts contained in the report he did not admi others. The best thing to do would be t adjourn the case to a special day as i wished to call in counsel.

His Lordship-The only question before is whother there is a prima facie case Counsel cannot assist me in that.

Mr Hind said counsel might be able to point out the legal effect of the facts on which the Official Receiver relied and thus show there was no prima facie case.

The Deputy Official Receiver (Mr A. G. M. Fletcher) saw no reason why the case should be adjourned. Counsel could appear in the Police Court on behalf of both

case, and asserted that for three years the facts alleged in the report had been in possession of the Official Receiver. - It was now very late to rely on intricate facts relating to business transactions taking place so long ago, and three years ago the debtor might have been able to produce facts rebutting those on which the Officia Receiver now relied. The Official Receiver was now making three charges against the the debtor and one against a creditor.

His Lordship said the debtor had manguvred in such a way that if he escaped the Bankruptcy Ordinance he would be the very clever. He thought there was a be a point of law involved in it that could be properly argued before the Criminal Court

Asked to explain the three years' delay, the Deputy Official Receiver said the had to provide a copy of his manifest before difficulty had been to get these people leaving, but here that formality was distripping. He was informed that he would never succeed but had tried his best because was convinced that this was a most fraudulint case.

the matter had been lost sight of altogether. The Deputy Official Receiver said that was before his time. He had been waiting for an opportunity, and now that the application for discharge, was made he had the opportunity.

His Lordship expressed the opinion that there was a case to go before the Attorney General, who could decide whether proceedings should be taken. He (his Lordship) did not direct proceedings but gave the law officers leave to take proceedings if they thought fit.

We offer 'him our hearty, congratulations on his promotion and our best wishes for his continuel success.

Sir Henry May said-Life is full of surprises, and you have given me one to-night. When I came into this room I had no idea you were going to do me the honour of presenting me with an address. I thank you for the honour and I shall prize the address very highly I thank you for the kind words with which it is accompanied. When the proposition was made to me some eight years ago to found a branch of the Y.M.C.A. here, I took up the project at once, because my long experience of the Colony told me that there was room for such an association which, if it were successful, would do much good here. In 1910, however, there was gatherings of the Association; to which a marked advance, 68 per cent. of the seniors having satisfied the examiners in the difference between the historical Caesar this subject. Those interested in education will be pleased to mark this evidence

of closer attention given to English composition in the Hongkong schools, more particlarly in view of the higher education to be soon offered through the university. Seeing that the university cannot be opened until after the beginning of next year, several of our students, impatient of delay, have left recently for England or America to pursue their studies in foreign seats of learning. For the benefit of a few others who, having passed the Oxford senior examination, wish for more advanced lectures by day, a university preparation class has been formed which we hope to continue throughout 1911. The contest for the coveted position of Dux of the college, always keen though friendly, has lost none of its interest because competed for by those in this higher form who wrestled for the honour last year.

The medal has been awarded to Leung Nai Hang. Among the year's innovations the half-yearly entrance examination and classes in Mandarin, which were promised beneficial. The teaching in mathematics come more acceptable to students how that t is recognised in the local examinations. The Wei On scholarship may not be taken by any, student two years, in succession. Under this rule both Leung Nai Hang and Chau Tsun Nin are not eligible for the

prize. For place in the Oxford Locals, therefore, the medal is awarded to Wei Wing Lock. See Chung Su is accorded in similar honour for premier position lin commercial subjects. There have been few contests on the playground this year. keener interest has been manifested cricket since the turfing of the ground in the summer. The only outside match layed was against Queen's College.

tennis contest with the Diocesan School we were likewise successful, but in football our losses outweigh the gains. The teaching power of the college has been increased by two hours' help daily which the Rev. C. B. Shann is able to spare while studying the Chinese language. Mr Fung Man Sui, one of our most successful old boys, has oined the teaching staff. Temporary assistance is also being kindly given by the Rev. S. W. Payne. The College Council s now in negotiation for an additional science master, in view of anticipated de-

velopments in this branch of study in connection with the university. He may be expected early in the your. Mr to say it was most enjoyable. mission at Naming under Dr Lechmere Clift. In addition to his heavy duties in the large fourth form, Mr Manderson has

given generous help in the playground. Since last report the Rev. and Mrs W. N. H. Howitt have taken up their residence in the college. This has been a distinct gain, noction with St Stephen's College on especially for the boarders. To Mr Howitt I am personally indebted for the ready and able manner which, notwithstanding the many claims upon his time, he has acted for meduring an enforced temporary absence from duty. The Angle-Chinese and classical masters. together with the office staff, have, always, rendered faithful service. To one and all the College Council wishes repeat its assurance of appreciation for good work done.

The establishment of a university in our midst has afforded the Church Missionary Society an opportunity of still further contributing somewhat to the educational efficiency of the Colony. The desirability of providing a Hostel for students attending the university was early hid before the Executive body of the society, and I am glad of this opportunity to tlink Your Excellency for your able advocacy of our proposal both before committee in London, and in Liverpool. For many years a C. M. S. Girls' School been conducted at "Fairles. property being immediately opposite the entrance to the university, it has been decided to remove he Girls' School elsewhere and to erect upon this valuable site a hostel which shall

be primarily for the convenience of students passing out from St. Stephen's College, and for such other students as may wish to reside therein provided the accommodation is sufficient. About one half of the initial sum required is now in view, so that we expect to be laying the foundations before many months have passed. The report of the Rev. F. H. Mann

upon examination of forms V and VI on Shakespeare's Julius Chesar was as follows :- I have pleasure in presenting you with the result of the examination. I have been surprised and gratified at the general standard of efficiency shown by the papers. Questions on contexts and allusions were answered with such accuracy and the also evidence of close study of the language of the play and appreciation of its beauty the texts accurately and to the point. There appears to have been some difficulty. in grasping the point of the questions as to and the Caesar of the play .- Yours truly (Sd.) FRANK H. MANN.

9. KUMSANG. FIRE ON THE S.

On learning this morning that Kumsang, which loft Singapore December 31st for Hongkong - ba had to put into Saigon owing the occurrence of a fire in her forehold. representative of the China Mail called on Mr Sutherland, head shipping clerk of Messre Jardine, Matheson, and Co. who informed him that the tire was first noticed on 5th inst. and they received the news by wire from Saigon on 6th. The fire was in No. 3 hold which contained chiefly jute, gruny bags and other cargo of an inflammable nature. By battening down the batches and turning on water and steam into the held the fire was

The s.s. Lacrtes, which arrived here from Saigon on Thursday, brought along the damaged steamer's passengers and mails. It is thought that very little damage has been done to the ship and that she will not require to be docked though the whole of the cargo in No. 3 hold is damaged. The Kumsang is still in Saigon discharging the damaged cargo to ascertain what damage has really been done to both ship and cargo: When the discharging is finished

### ATTEMPTED ROBBERY WITH VIOLENCE.

Lai Chun was charged before Mr E. R. Hallifax, at the Magistracy this afternoon, with attempted robbery with violence. Inspector James Kerr said that on the 10th inst. two Chinese came and knocked at the door of a house, No. 171 Wancha Road, and on going to the door defendant asked if the boy was in. Complainant, woman, said the boy was out and would return about 6 p.m. About an hour afterwards there was another knock at the door when defendant and another asked her the time. As she was complying with their request, they, thaving ascertained that the boy was out, rushed into the house and defendant seized her by the throat. She screamed and they run away. Two Japanese, who were on the ground floor, 31, Queen's Road Central eaught hold of defendant as he was leaving while his companion got away. One of the Japanese found two rolls of wire on the staircase while Sergeant Ogg also picked up

packet of pepper.

The result of the examinations made under the sale of food and drugs ordinance 1896 for the quarter ending December 31, was submitted at the meeting of the Sanitary Board this afternoon.

Dr G. H. L. Fitzwilliams minuted.-At former meeting of the Board I saked if such offences as the adulteration, etc., of alcoholic bevereges could not when detected be made more public. It is for the general good that these should be published and posted in all licensed public houses and in the service canteens. Mr. A. Shelton Fooper. What was the

nature of the adulteration of the brandy and what subsequent proceedings were taken in the matter? Hon. Mr A. W. Brewin-I cannot under-

stand why eight samples of spirits are examined to only two of milk. Is there no other article of food that is adulterated?

Mr J. R. Wood, Ho Po Shang, tenant of No 3, Peel Street, was charged by the Building Authority with carrying material divintions with regard to a plan passed by the Building Authority by inserting soft wood instead of hard wood fittings in the building. A fine of \$25 was imposed and defendant was ordered to complete the work according to the plan.-The tenants of two houses in Canton Road, Kowloon were fined \$1 each by Mr E. R. Hallifax. for firing crackers without a permit from the Registers General. It appears that some members of the family were firing crackers a few days previously and the occupants of the whole terrace were warned by Impector Langley. The practice was to wait until a rickshaw was passing, and then drop a whole bunch of crackers. - A fine of \$55 or seven weeks imprisonment 'ei Ming Look, excused responsions; See, was imposed on a native for boiling opium in Kowloon City .- A gambling raid was executed by Detective Bergeant Wills at No Chater Road on Monday night with the result that ten men were fined \$10 each one \$5 and another \$12, by Mr J. ### A DISCOUNTED RUMOUR.

A statement was published this morning to the effect that the s.s. Mongolia was rumoured to have sunk near the Hawii Islands, but from enquiries which we have made it would appear that there is no truth in the rumour, which has naturally created regreat deal of unnecessary anxiety.

Our representative this afternoon called at the offices of the Pacific Mail Steamship Company and was informed that absolutely no news had been heard of any such disaster, and that if it had occurred they would certainly have been informed. The Acting Manager stated, further, that he believed that the rumour had not the slightest foundation in fact, and sided that he would be glad if the China Mail would
